200+

Years of Combined Experience

Your Local Risk Management Expert

Foster White was founded by professionals who saw that the common-place insurance agency model failed clients at the very moment when they needed the most support: at the time of a claim. Our team is different – with a staff of experienced professionals with backgrounds in underwriting, loss control, claims and large brokerage, we were built on the premise of being our client’s constant and consistent advocate in all areas of their risk management program. Our approach, experience, and small-town roots are what sets us apart. Hard working, humble, and always there when you need us. We do what we say and deliver the results to prove it.

Resources

In addition to providing a best-in-class insurance experience, we have partnered with exceptional local firms to support all facets of your business operations and provide you with the knowledge and expertise to best manage your risk. We have negotiated exclusive pricing on safety, compliance, claims, legal, retirement benefits, and HR services- these teams operate as an extension of ours in a partnership to support you.

Analytics

Big data is here to stay and becoming a critical part in managing risk. Our tools will help:

- Keep your rates low
- Stay ahead of emerging risks
- Purchase the right amount and types of insurance – know what you’re buying and why
- Identify trends and patterns in losses to create a responsive and results-oriented loss control program
